CHAPTER 1

Signals and Waveforms

1.1 Overview

This chapter is a concise refresher on the signal theory aspects repeatedly used in the book. The most essential concepts are clarified and their physical meanings are explained. Simultaneously, some rigorous definitions, most proofs, and mathematical subtleties unimportant for the book are omitted. It is expected that readers are familiar with the signal theory approximately at the undergraduate electrical engineering level. Therefore, the material is presented in the order that allows its most concise explanation, but may not be optimal for initial study. For example, bandlimited signals are mentioned prior to the Fourier transform explanation, and the notion of stochastic (random) processes is introduced before discussing random

IEEE JOURNAL OF SOLID-STATE CIRCUITS, VOL. 52, NO. 1, JANUARY 2017 127

Eyeriss: An Energy-Efficient Reconfigurable Accelerator for Deep Convolutional Neural Networks

Yu-Hsin Chen, *Student Member, IEEE*, Tushar Krishna, *Member, IEEE*,
Joel S. Emer, *Fellow, IEEE*, and Vivienne Sze, *Senior Member, IEEE*

Abstract—Eyeriss is an accelerator for state-of-the-art deep convolutional neural networks (CNNs). It optimizes for the energy efficiency of the entire system, including the accelerator chip and off-chip DRAM, for various CNN shapes by reconfiguring the architecture. CNNs are widely used in modern AI systems but also bring challenges on throughput and energy efficiency to the underlying hardware. This is because its computation requires a large amount of data, creating significant data movement from on-chip and off-chip that is more energy-consuming than computation. Minimizing data movement energy cost for any CNN shape, therefore, is the key to high throughput and energy efficiency. Eyeriss achieves these goals by using a proposed processing dataflow, called row stationary (RS), on a spatial architecture with 168 processing elements. RS dataflow reconfigures the computation mapping of a given shape, which optimizes energy efficiency by maximally reusing data locally to reduce expensive data movement, such as DRAM accesses. Compression and data gating are also applied to further improve energy efficiency. Eyeriss processes the convolutional layers at 35 frames/s and 0.0029 DRAM access/multiply and accumulation (MAC) for AlexNet at 278 mW (batch size $N = 4$), and 0.7 frames/s and 0.0035 DRAM access/MAC for VGG-16 at 236 mW ($N = 3$).

Index Terms—Convolutional neural networks (CNNs), dataflow processing, deep learning, energy-efficient accelerators,

be more energy-consuming than computation [10], [11], the processing of CNNs has to not only provide high parallelism for high throughput but also optimize for the data movement of the entire system in order to achieve high energy efficiency. In addition, this optimization needs to adapt to the varying shapes of the high-dimensional convolutions in CNN.

To address these challenges, it is crucial to design a compute scheme, called a *dataflow*, that can support a highly parallel compute paradigm while optimizing the energy cost of data movement from both on-chip and off-chip. The cost of data movement is reduced by exploiting data reuse in a multilevel memory hierarchy, and the hardware needs to be reconfigurable to support different shapes. To further improve energy efficiency, data statistics can also be exploited. Specifically, CNN data contains many zeros. Techniques such as compression and data adaptive processing can be applied to save both memory bandwidth and processing power.

Previous work has proposed hardware designs for CNN acceleration [12]–[22]. However, most of them only have simulation results that are not verified by the measured results from fabricated chips; implementations using FPGA also do

ABSTRACT

In this study, an effective and novel method, termed Metamodel Assisted Hybrid of Particle Swarm Optimization with Genetic Algorithm (MA-HPSOGA), is developed to identify unknown structural dynamic parameters. The method first constructs four popular metamodels to substitute the computationally expensive numerical analysis based on the Latin hypercube sampling method and probabilistic finite element analysis, and their accuracy is assessed by R-squared. Subsequently, a suitable and low-cost metamodel is selected in combination with a hybrid optimization strategy by incorporating Genetic Algorithm (GA) into Particle Swarm Optimization (PSO). Two examples with measured vibration response data and different levels of complexity are used to verify the effectiveness and practicality of the presented method. The results showed that polynomial chaos expansion assisted HPSOGA has the highest computational efficiency and accuracy in the four coupled methods. Besides, compared to the conventional iteration-based dynamic parameter identification methods, the presented method shows an overwhelming advantage in terms of computational efficiency. Furthermore, the performance of HPSOGA is compared with its sub-algorithms, showing that the hybrid strategy offers faster convergence and

Fuzzy Expert Systems: Economic and Financial Applications

GISELLA FACCHINETTI
*Faculty of Economics-University of Modena and Reggio Emilia,
Via Berengario 51-41100 MODENA Italy, e-mail: fachinetti@unimo.it*

Resorting to mathematical modelling is very often the way to explain real world phenomena under investigation. However, in some case, the phenomenon complexity is so hard that building a mathematical model is an impossible or very difficult task. In those cases, some heuristic approaches can be used to deal both with missing information and the complexity. Moreover, some lack of knowledge exists and then the phenomenon cannot be deeply described with traditional quantitative tools, then only an incomplete model can be developed.

It turns out that sometimes traditional mathematical and statistical models are not able to precisely emulate the phenomena under investigation. In those situations, the Artificial Intelligence approach can provide tools for understand and treat with complex or incomplete phenomena. It is remarkable that in those cases Artificial Intelligence enjoyed many successes, most of which are due to Expert Systems. An Expert System incorporates the reasoning of human experts in a particular domain, and combines it with the computer processing and memory capacities.

The most important characteristics of an Expert System are: (Schneider and others 1996)

1. user-friendliness
Since the user is not necessarily familiar with the inner operations of the system, it should be easy to use and its functionality should be self-explanatory.
2. learning capacities from past experience.
As with human experts, the ability to learn means that the expert system is able to reach similar solution faster when the same problem is presented more than once. It is possible to divide learning in three types: learning from examples, learning by analogy, learning by skill refinement

Title: Computer Networks
Department: Computer Science and Engineering
Author: Prof. Sujoy Ghosh
University: IIT Kharagpur
Type: video
Abstract: Overview of OSI reference model. Topology design, Media Access Control Level, Services, Problems and protocols, Practical local area network design and implementation. IEEE LAN Standards, Logical Link Control protocols, HDLC, ALOHA, SLOTTED ALOHA, FDDI, Client Server model and related softwares.

Network Layer level services, problems and protocols, WAN, MAN, interconnection networks related.

Report generated on Accession register

The screenshot shows the SoftLib6.0 web application interface. At the top, the browser address bar shows the URL 192.168.19.21/MainFrame.aspx. The application header includes the logo 'SoftLib6.0', the license information 'Licence To : NAGAR YUWAK SHIKSHAN SANSTHA', the institution name 'YESHWANTRAO CHAVAN COLLEGE OF ENGINEERING', and a welcome message 'WelCome , PRAGYA BHADANGE' with a note 'You had forgotten to punch today or data is yet to fetch.' Navigation buttons for Home, Opac Search, Contact, and Help are visible.

The main content area is titled 'Accession Register'. It contains a form with the following fields and options:

- Institute Code:** YCCE (dropdown menu)
- Department
- Accession Register Entry: Y (dropdown menu)
- Between Accession No.: from 87001 to 87065
- Series: E (dropdown menu)

A 'Show' button is located below the form fields. To the right of the form is a 'Sort By' section with five dropdown menus (1-5) and an 'Order By' dropdown set to 'Asc'. Below this is a 'Report Format' section with a dropdown menu set to 'PDF Format' and 'Show' and 'Close' buttons.

A sidebar on the left contains a navigation menu with categories like 'Change Password', 'CLEARANCE', 'LIBRARY', 'Acquisition', 'Add User', 'Circulation', 'Main Entry', and 'Reports'. The 'Reports' section is expanded, showing various report options including 'Accession Register'.

At the bottom of the page, there is a Windows taskbar with the search bar, taskbar icons, and system tray showing the date and time as 12:56:14 PM on 9/2/2023. An 'Activate Windows' watermark is visible in the bottom right corner.

Bar code

The screenshot displays the SoftLib6.0 web application interface. At the top, the browser address bar shows the URL `192.168.19.21/MainFrame.aspx`. The application header includes the logo "SoftLib6.0", the license information "Licence To : NAGAR YUWAK SHIKSHAN SANSTHA", the institution name "YESHWANTRAO CHAVAN COLLEGE OF ENGINEERING", and a user greeting "Welcome, SONAM SHEIKH". A warning message states "Your session is about to Expire in 00:00 Click to continue." Navigation buttons for Home, Opac Search, Contact, and Help are visible.

The main content area features a left-hand navigation menu with categories such as "Member Category", "Reports", "USER MANAGEMENT", and "ADMIN". The "Barcode Spine Label" option is highlighted in the menu.

The central configuration window, titled "Bar Code Spine & Spine Labels", contains a dropdown menu for "Bar Code Label By" (set to "----Select----") and two radio button options: "A4 (8X3)" (selected) and "A4 (12X3)". A "Show" button is located below these options.

The footer of the application displays the copyright notice "SyNchRonik Inc. All right Reserved @ 2009-2023". The Windows taskbar at the bottom shows the system clock as 12:54 PM on 31-Aug-23.

Bar code

The screenshot shows a web browser window displaying a PDF document in Adobe Acrobat. The browser tabs include 'SyNchRoniK Inc. SackInfo 2.5' and 'Showreport.aspx.pdf'. The address bar shows the URL: 'chrome-extension://efaidnbmnnpbpcjpcglcfindmkaj/http://192.168.19.21/Report%20Sort_Format/Showreport.aspx'. The Adobe Acrobat interface is visible, with a 'Welcome To Acrobat' sidebar on the left and a 'Tools' panel on the right. The main content area displays a PDF document with the following text and barcode elements:

Book binding process

The screenshot displays the SoftLib6.0 web application interface. At the top, the browser address bar shows the URL 192.168.19.21/MainFrame.aspx. The application header includes the logo 'SoftLib6.0', the license information 'Licence To : NAGAR YUWAK SHIKSHAN SANSTHA', the institution name 'YESHWANTRAO CHAVAN COLLEGE OF ENGINEERING', and a user greeting 'Welcome, SONAM SHEIKH'. A red warning box indicates 'Your session is about to Expire in 00:00. Click to continue.' Navigation buttons for Home, Opac Search, Contact, and Help are visible.

The left sidebar contains a menu with categories: 'Change Password', 'CLEARANCE', 'LIBRARY', and 'USER MANAGEMENT'. Under 'LIBRARY', there is a 'Reports' section with a list of report types, including 'Book Binding Report'.

The main content area shows the 'Book Binding Report' configuration form. It includes a 'Binder Name' dropdown menu (selected), checkboxes for 'Reference No' and 'Send Date', and a 'Report Format' dropdown menu (set to 'PDF Format'). A 'Show' button is located at the bottom of the form.

The Windows taskbar at the bottom shows the system clock as 2:49 PM on 31-Aug-23, along with various application icons.

S. No.	Journal Title	Subject area	Sub-Subject area
1	Accident Analysis & Prevention	Engineering	Safety, Risk, Reliability and Quality
2	Acta Astronautica	Engineering	Aerospace Engineering
3	Ad Hoc Networks	Computer Science, Engineering	Computer Networks and Communications, Control and Systems Engineering
4	Additive Manufacturing	Engineering	Industrial and Manufacturing Engineering, Mechanics of Materials
5	Advanced Engineering Informatics	Computer Science, Engineering	Artificial Intelligence, Civil and Structural Engineering, Control and Systems Engineering, Mechanical Engineering
6	Advances in Engineering Software	Computer Science, Engineering	Software, Computational Mechanics
7	Aerospace Science and Technology	Engineering	Aerospace Engineering
8	AEÜ - International Journal of Electronics and Communications	Computer Science, Engineering	Computer Networks and Communications, Electrical and Electronic Engineering
9	Analytic Methods in Accident Research	Engineering	Safety, Risk, Reliability and Quality
10	Annual Reviews in Control	Engineering	Control and Systems Engineering, Electrical and Electronic Engineering
11	Applied Acoustics	Engineering	Mechanical Engineering
12	Applied Clay Science	Engineering	Industrial and Manufacturing Engineering
13	Applied Energy	Engineering	Civil and Structural Engineering, Mechanical Engineering
14	Applied Ergonomics	Computer Science, Engineering	Human-Computer Interaction, Industrial and Manufacturing Engineering
15	Applied Mathematical Modelling	Engineering	Computational Mechanics, Control and Systems Engineering
16	Applied Mathematics Letters	Engineering	Computational Mechanics, Control and Systems Engineering
17	Applied Ocean Research	Engineering	Ocean Engineering
18	Applied Soft Computing	Computer Science, Engineering	Computer Science Applications, Control and Systems Engineering
19	Applied Thermal Engineering	Engineering	Mechanical Engineering
20	Artificial Intelligence	Computer Science, Engineering	Artificial Intelligence, Computational Theory and Mathematics, Engineering (General)
21	Artificial Intelligence in Medicine	Computer Science	Artificial Intelligence
22	Astronomy and Computing	Computer Science	Computer Science Applications, Software
23	Automatica 351	Engineering	Control and Systems Engineering, Electrical and Electronic Engineering

AUDITOR'S REPORT

We have audited attached financial statements of the **YESHWANTRAO CHAVAN COLLEGE OF ENGINEERING, NAGPUR** Managed by **NAGAR YUWAK SHIKSHAN SANSTHA, NAGPUR** as of and for the year ended on 31st March 2023. These financial statements are the responsibility of the management of the trust. Our responsibility is to express an opinion on these financial statements based on our audits.

We have conducted our audits in accordance with the auditing standards generally accepted in the India. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for the designing audit procedure that are appropriate in the circumstances, an audit also includes examining, on test basis, evidences supporting the amounts and the disclosures in the financial statements, assessing accounting principles used and significant estimates made by the management, as well as evaluating the financial statement presentations. We believe that our audits provide the reasonable basis for our opinion. On the basis of our audits, report that-

1. We have obtained all the information and explanations, which to the best of our knowledge and belief are necessary for the purpose of Audit and for determination of fees by the Authority
2. Proper books of accounts as required by law have been kept.
3. The Balance Sheet and Income and Expenditure Account referred to in this report are in agreement with the books of accounts maintained.
4. Mercantile Method of accounting is consistently followed by the institution and there is no change carried out during previous year.

In our opinion and to the best of our information and according to the explanation given to us, the said Financial Statements gives a true and fair view.

- a) In so far it relates to Balance Sheet of the State of Affairs of the Trust as on 31st March 2023.
- b) In case of Income and Expenditure Account of Surplus for the year ended on 31st March 2023.
